

iPad/iPod/iPhone Email

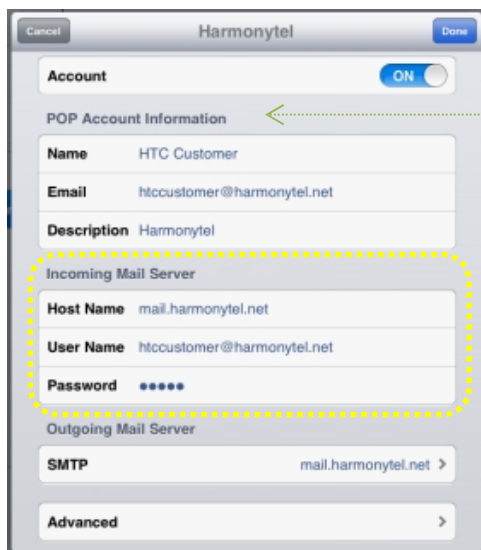

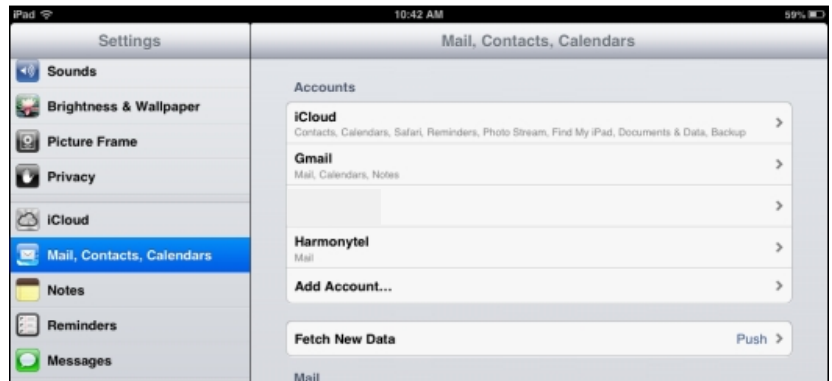

Double tap your home button. This will open a task bar, showing you the apps you have running. You will want to close out all running programs (hold down on one of the apps till the '-' shows up, click the minus to close), to allow for quick verifying with email.

Open Settings

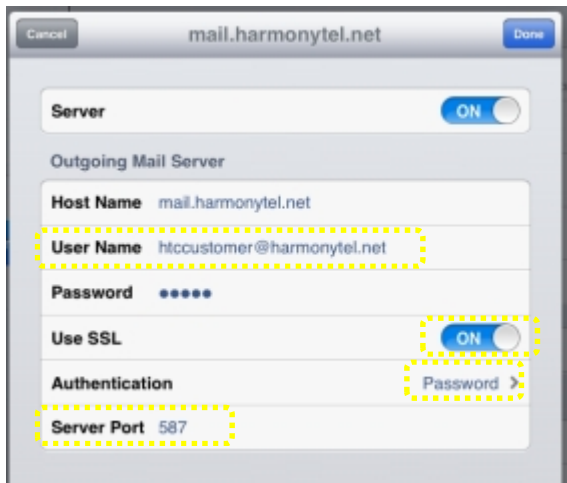

Find Mail, Contacts, Calendars tab.
Click on your Harmony Tel email.

Tells you if you are setup as a Pop3 or IMAP server. If you would like to change this, you will need to delete and re-add your email/settings.

Change User Name to your full email address.

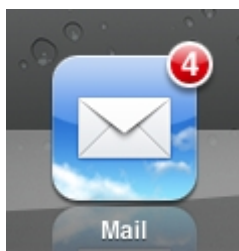

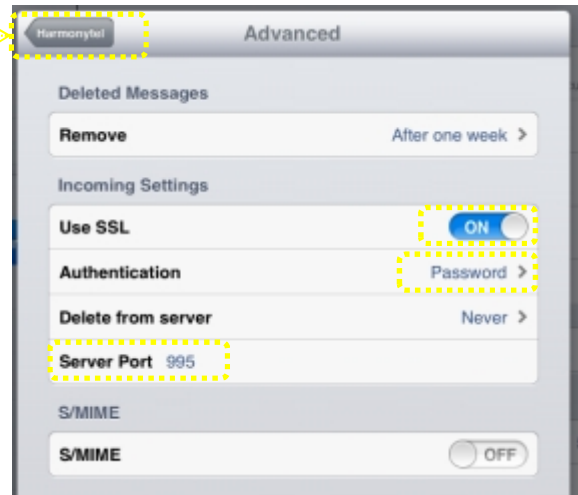

Tap Done

Under Outgoing Mail Server (SMTP) Arrow,
change Outgoing Settings
(User Name should be full email address)

Tap Done

Under the Advance arrow, change
Incoming Settings.
Then return to main email setting.

Click Done.

It will begin to verify, may take a few minutes.
Once it's done you can close out of your settings and
go to your Email App, find your Harmony Tel email
and sync.
